Full Stack Web Developer

Initiative-taking and self-driven developer looking for an opportunity in the Full Stack Web Development field. I am a task-oriented, visual learner who love designing in pseudo code to see the bigger picture. I am skilled in Full Stack, including HTML, CSS, JavaScript, NODE.JS packages, REACT, SQL, NOSQL, and PWAs. Great collaborator who loves a good challenge and is great at problem solving. Always enthusiastic about my work and strive for excellence.

Projects

Wine Paring App, <https://jerger1470.github.io/BCEI-Project01/>, <https://github.com/jerger1470/BCEI-Project01>

Application that takes user inputted ingredients and finds them a recipe and possible wine parring
-Front-End Developer(role), created HTML and CSS for the project as well as setting up front-end to use data

Link Library App, <https://ancient-wave-03804.herokuapp.com/>, https://github.com/jerger1470/Group03_Project02

Application that uses the Youtube API and user-defined video links and stores them in a database for the user
-Front/Back End Developer(role), worked on API calls for both server-side and client-side
